HAHN SERIE 60 AT

DESCRIPTION

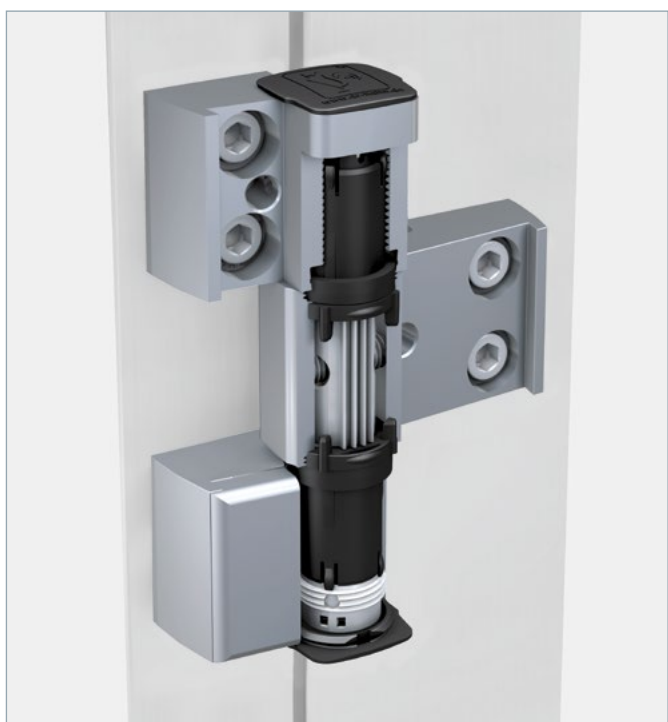

NEW! HAHN SERIES 60 AT – ENSURING MAXIMUM FLEXIBILITY

The further development of the Hahn Series 60 AT has optimised and perfected the design. Thanks to the wide variety of mounting options, door installers are able to precisely match the hinge design to their installation situation. For instance, mounting plates are used for single chamber systems. For multiple chamber systems with a minimum wall thickness of 1.6 mm or more, the Hahn anchor screw is the method of choice.

Special requirements, for instance pressure-sensitive or veneered profile sections, can be ideally served with the Hahn screw anchor.

With the new design, door leaves can be moved horizontally by ± 2.5 mm due to structural changes. In terms of height, the hinge can also be adjusted by +3 mm and -2 mm. The most important achievement for door installers is that in most cases doors no longer have to be removed in order to adjust their sealing pressure.

- Areas of application:
Doors made of metal sections, suited for both residential and commercial structures
 - Main entrance doors
 - Side entrance doors
 - Functional doors
 - Interior doors
 - Exterior doors
 - Entrance doors for flats
- The hinge system offers a variety of possible combinations and mounting options for inward and outward opening doors with reversible profile and corner post construction.
- All metal parts of the hinge are protected against corrosion. Stainless steel version available for abnormally high loads.
- Special designs for folding doors and intrusion-resistant doors.
- Available for all common aluminium and steel profile sections.

SYSTEM / APPLICATION

- Material: Made of extruded aluminium
- Fastening method: Fastening using anchor screws, screw anchors or mounting plates
- Versions: Two pivot points 20 and 36 mm
- Load capacity: Max. 220 kg depending on profile design
- Adjustability:
Adjustable in 6 directions with door leaf mounted:
 - Height adjustment using integrated lifting and lowering spindle, infinitely variable + 3 mm, - 2 mm
 - Horizontal adjustment, variable ± 2.5 mm
 - Sealing pressure ± 0.5 mm, individual variations require unhinging of leaf
- Usable DIN left / DIN right
- Certificates:
 - CE-certified according to EN1935:2002, hinge class 11/14
 - SKG 2 stars
- Colours: Hinges available in anodised and RAL colours
- Allows doors to open up $> 180^\circ$
- Bearing point maintenance-free
